

PySpark Introduction

Agenda

- PySpark
- Installation

Spark as Polyglot

Spark as Polyglot

Spark with Python and Scala

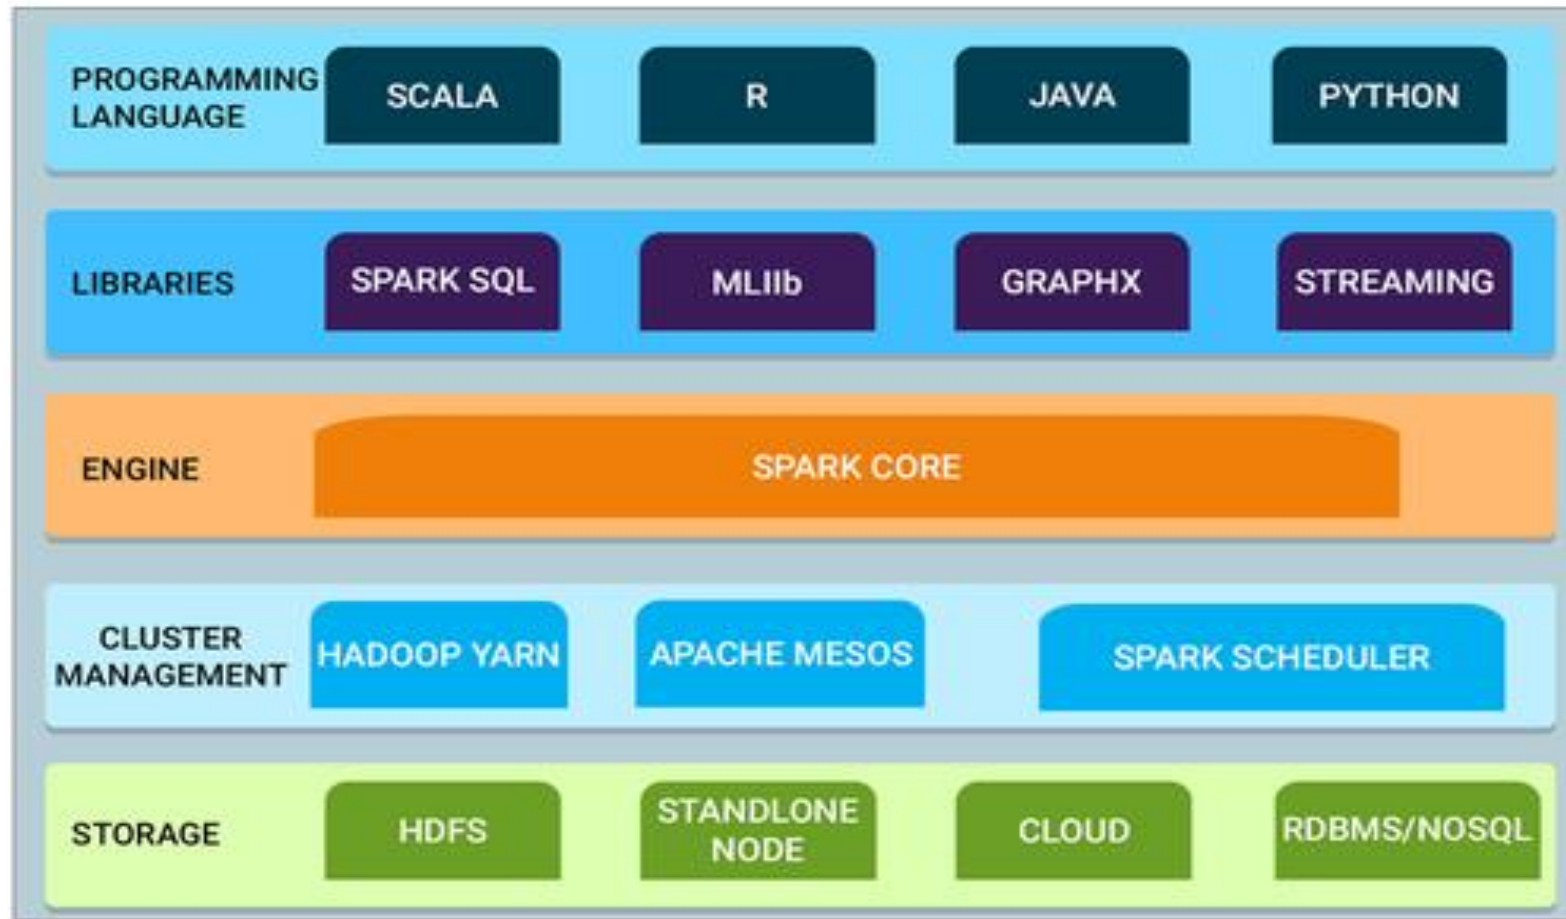

Criteria	Python	Scala
Performance	Python is Slower than Scala when used with Spark	Spark is written in Scala, so it integrates well with Scala
Learning Curve	Python has simple syntax, its easy to learn	Scala is complex syntax. Hence is not easy to learn
Code Readability	Readability, maintenance and familiarity of code is better	Scala is sophisticated language, Developers need to pay lot of attention
Data Science Libraries	Rich set of libraries for data visualization and model building	Scala lacks in providing data science libraries

What is PySpark?

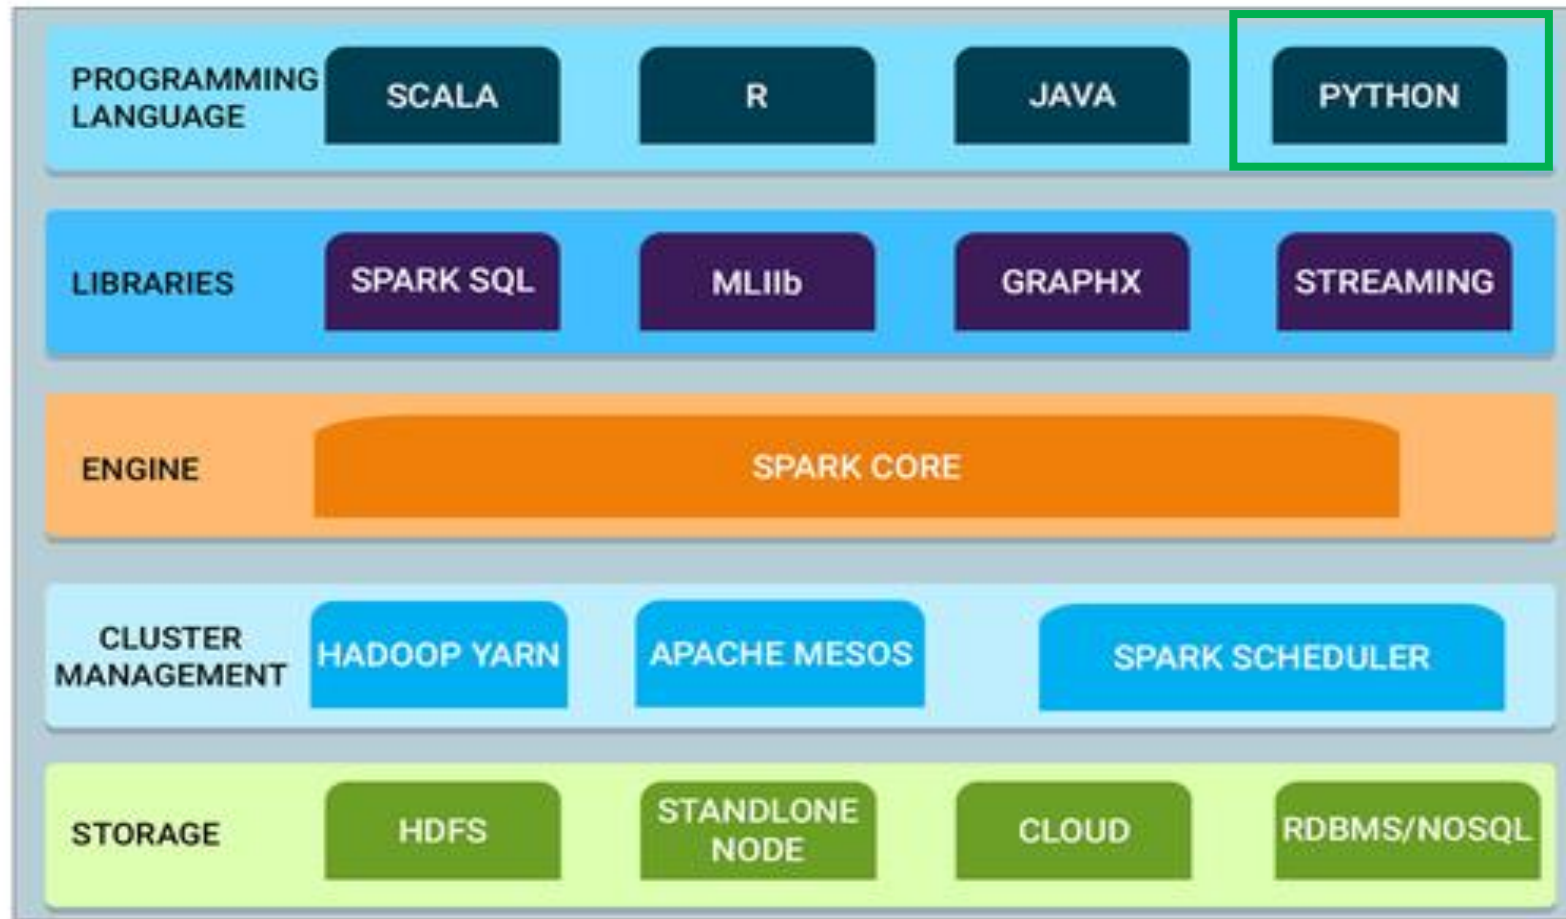

- Apache Spark + Python
- Apache Spark open source real time processing framework
- **PySpark** is the python API for Spark
